

AIR FUTURE GROUP

The Australasian commercialisation of distributed compressed-air solar energy storage, plus clean vehicles, providing affordability and sustainable solutions (catering to the renewable energy & clean transport climate revolutions).

Industry: Pictures are clearer at: www.airfuturegroup.com.au/documents.

Due to climate change, huge global investment, and policy, clean energy and transport are in a revolution. Air Future Group can be at the very forefront of these. Side image shows our clean vehicles & energy storage along with home solar at family home. Benefits include affordability and economic scale and user benefits.

AUSTRALASIAN COMMERCIALISATION

Technology

Our technology partner MDI in Europe are world leaders in compressed air vehicles and energy storage. MDI do not sell but licence. They also have product partners.

Commercialisation

We Air Future Group are exclusively licenced to both market and produce MDI products via regional factories.

MARKETS & DISTRIBUTION CHANNELS

Products

AirPod

Consumer & commercial

GreenAir

Golf & utility vehicle

AirWall

Scalable energy storage

Pipeline

Current & pipeline

INVESTMENT & PRODUCTION

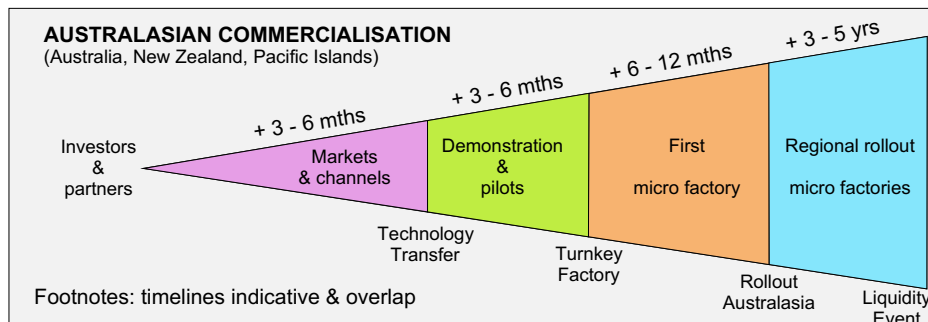

Investment

Four investment stages:-

1. Markets & channels
2. Demonstration & pilots
3. First micro factory
4. Regional factory rollout
(Liquidity event option year 3-5)
Note: Financials in separate paper

Production

Rollout will seek regional partners per micro factory
