## Waste collection for VEOLIA

« Because  
sustainability must be  
accessible to all »

Veolia is a major player within the field of waste management in France. Its objectives as regards urban cleanliness. In this context, MDI works together with Veolia, in particular offering its expertise in the design and production of non-polluting vehicles and systems.

50 km

### new generation of industrial service transportation

The AirBom Light is the fruit of the collaboration between Veolia and MDI. It is powered by compressed air and emits absolutely no gases or particles. It enables a significant reduction to the impacts of collection on the quality of life and health of residents thanks to limited bulk and motorisation.
